In abstract 74 (DOI: 10.1136/injuryprev-2017-042560.74), in the 'Statement of purpose', there is a missing period between 'US' and 'IPV'. The two sentences should read as follow: 'Previous studies suggest 10% prevalence of IPV [intimate partner violence] in an Arab community from the mid-western US. IPV is also linked to increased risk of reproductive coercion (RC) and limited reproductive autonomy'.
