<i>Physical consequences</i>				
	Woman	38	1137	The constant pain in my neck has affected my life. It's hard to bend in all directions
	Woman	65	1142	Still have pain from heavy lifting and extra effort.
	Woman	46	1216	After the crash in January 2009, I have had problems with the neck and inflammation around the 7th cervical vertebrae. It quickly becomes overloaded, with inflammation as a result. Get pain when the weather gets bad, especially when it's colder.
	Woman	61	1230	I have been unable to live a normal life since the crash because I always have pain, more or less, and can't do some things, like change the bulb in the ceiling lamp, wash windows and such.
	Woman	36	1968	Got a strong concussion. Immediately after the crash, I had a lot of dizziness, poor memory, difficulty concentrating, hard to find the words, tired, irritated. Still have it after 1.5 years, poor memory, difficult to handle stress, dizziness. Doesn't feel like it "used to in the head," despite the fact that it has gradually become better.
	Woman	52	1354	... I've always managed things by myself, but now I have pain, for example, if I do the laundry, vacuum, walk too much, stand still too long, sit too much and so on. Some things like renovating, doing the wallpaper and so on, I can't do anymore. If, for example, I were to go to the laundry room myself and do the laundry, it would take between 3-4 days before all the pain subsides.
	Woman	58	1435	Limited mobility, headache and neck pain daily, weakness in arms and hands. Can only walk and do some movements with my arms. I get tired quickly and feel weak, sensitive to stress, difficulties with memory and concentration, can't sit for too long.
	Man	38	1182	Can't sit and concentrate, or sit still in front of the computer or the desk for a long time, because then I'll get pain in my neck. I get tired quickly, pain in the neck after just doing unilateral work, movements.
	Man	57	1281	Have trouble doing some physical activities, become sore and stiff in the back. Have also had reduced strength in the left leg. Sad to not be able to exercise and get better physically and have more energy.
	Man	31	1293	After the crash, I have problems with my back and neck. The trouble comes when I sit still for a long time, for example, at the cinema or sit for

				long stretches in the car. I often have tension headaches.
	Man	30	1618	Can't use my left arm to even do simple things like wash dishes. The pain goes from the neck down to the arm ... some days I can't even get out of bed without help.
	Man	50	1661	Have pains on the left side, have difficulty walking long stretches. The pain comes and goes and I've become much more depressed; I'm mentally imbalanced.
	Man	17	3278	I don't feel good at all. Have a lot of fluid in the stomach and use a lot of medicine. I visit the doctor regularly, but I will never be well.
<i>Psychological consequences</i>				
	Woman	28	1048	After the crash, I feel scared when I bicycle to and from work when I have to "cycle" past the intersection where I was hit. It has also affected me so I don't trust drivers when I come walking or bicycling at the crosswalk. I often get the bad feeling of losing control of the bike and my body when I fell off the bike and was hurled against the car.
	Woman	62	1123	When an unexpected situation comes up, I get worried and can start crying, for example, when a car is getting too close without warning.
	Woman	22	1210	After my traffic injury, I've been worried when I'm out on the roads. Not when I drive myself, but when I'm sitting on the passenger side of a car since I don't have control over the car ...
	Woman	39	1382	I'm worried and nervous when I have to drive. I always plan my trip in advance and think about my route before I get in the car. I sit and drive all tense and am very aware of what everyone around me is doing. I don't trust anyone on the road ...
	Woman	28	1716	... Have difficulty driving in the winter (slippery plus snow, dark). Feel panicked and sweaty and get terrified. I get tense, which makes me get neck pain and then avoid driving. This is a problem for me.
	Man	26	1337	It has affected me mentally the most, I'm afraid to drive a car, don't trust the road conditions and maintenance of the roads ...
	Man	21	1449	Was hit from behind, so it has been different on the roads. Hate it when cars are too close and hate to be close to other people when I am coming from behind.
	Man	65	2991	... The other injuries are healed except the fear of meeting large trucks on slippery roads.

	Man	32	3114	As a consequence of my constant pains in my back and neck, I have been affected by mood swings (irritation) (concentration).
<i>Everyday life consequences</i>				
	Woman	47	1026	Because a taxi hit me when I was bicycling, I get scared when I am in the same situation as the crash. You become extra careful.
	Woman	29	1206	I have tried to work with all the problems I have had, but I don't know how long you can work with an inconvenience. I take medicine and go to physical therapy.
	Woman	20	1540	Sometimes, it may be difficult with some tasks at work or at home when I get a lot of pain in my back. Have no strength to do some things or move.
	Woman	32	1793	Irritable, neck pain (in the arms, for example, after driving the motor cycle). A lot of headaches. Easily become depressed when I have to plan some of my activities due to a lot of pain / fatigue afterwards for about 1 day. If I want to work, I'll skip some activity. With pain comes fatigue.
	Woman	54	1800	... Reduced strength and pain in the right shoulder associated with certain physical activity. Previously, I trained for triathlons, which I've had to stop. Get some pain with long walks. Before, I trained for about 6 hours a week. Now, I train for about 2 hours a week plus walking.
	Woman	30	2720	The road injury has affected my life in such a way that I have been excessively cautious on the roads, regardless of whether I bicycle, walk, drive or am a passenger in a car. When I go in a car with someone, I'm always afraid, afraid that cars coming on to the roads will drive right into us, afraid that the distance to the car in front of us is too little, afraid if the person driving does not have both hands on the wheel, angry if the driver is talking on the phone and even worse, if the driver's writing text messages. I have the feeling that I will die on the road, which is why my partner and I live in town near our jobs to reduce the amount of time on the road.
	Man	23	1028	Today, I am more careful about choosing safer means of transport, such as a good working bicycle (than usual), a seat belt in public transport and don't stress when on the road.
	Man	41	1611	Have trouble with my back, which means I can't socialize with my children. And even problems with managing my job during some periods. The injury also affects my ability to sleep at night.

				Have trouble getting up in the morning.
	Man	36	1924	On sick leave. Can't play with my daughter, can't "be" with my wife. Or properly handle everyday life.
	Man	20	2030	Can't run more than short distances. Pain in the neck and knee, especially when it's cold. Can't go on rides at Liseberg (<i>amusement park</i>) or other things that affect the neck. Can't be as sporty as normally.
	Man	33	2089	From having a job, girlfriend, social relations, positive outlook to life, comfortable house, perfect relationship with my daughter. To be unemployed, run out of unemployment benefits, no friends, see no future, no girlfriend, forced to move, can't do activities with my daughter, constant pain, taking maximum dose pain reliever, maximum dose muscle relaxant medicine. Can't urinate by myself anymore, sleep 2 hours at a time, can't walk, no active sex life, can't eat whatever I want because my stomach is much more sensitive now.
	Man	61	2296	I have become weak in my right shoulder and can't work with my arms over my head, which is the most common thing in my work as a car mechanic.
<i>Financial consequences</i>				
	Woman	51	1031	My car insurance in the future will be more expensive and other insurance policies will also be increased. Besides this, I feel angrier than before the crash. Hit my head in the car roof and have not had pain but a new anger that I can attribute to economic loss but not just that. I feel that it affected me. Now, it's getting better after 1.5 years but it's not like before.
	Woman	61	1230	I have tried to go back to work 75%, but then the pain worsened and extended to most of my body. Tried to go back again, but I couldn't do more than 50%...
	Woman	51	1933	My injury has caused my mobility in my neck to be limited. Currently, I am employed at Samhall (<i>Community Services</i>). Can't work in the profession that I have educated myself in, as a nurse.
	Man	26	1337	Has affected my studies and, in turn, my financial situation ...
	Man	32	2128	My ability to perform my future occupation (studied full time to be a dentist before the crash; now, I can barely study half-time). I'm unsure; I'll be happy if I can work part-time.
	Man	21	1471	I have pain in my back /neck and chronic

				headaches with strenuous activity and when I study. As a result, I have problems with financial study aid and I'm therefore having some financial problems, which in turn gives me mental problems. I am very tired.
