Table SA.2. Article Inclusion and Exclusion Criteria

Inclusion Criterion	Exclusion Criterion
<ul style="list-style-type: none"> • Implemented and/or assessed an MSK-IMPP targeting military service members. • Primary* or secondary† MSK-I prevention • Assessed military MSK-IMPP implementation, effectiveness, and/or efficacy. • Primary research studies, reviews, meta-analyses, guidelines or grey literature (including government reports, unpublished and ongoing trials, annual reports, dissertations and conference abstracts). • Human studies • Published in English 	<ul style="list-style-type: none"> • Did not implement or assess an MSK-IMPP (e.g.: Individual MSK-I risk factor association or odds studies, development of MSK-I prediction models). • Did not include military service members, or assessed MSK-IMPP targeting a mixture of military service members and other populations without specifically delineating military service member findings. • Assessed MSK-I caused by traumatic motor vehicle/cycle collisions, slips, trips, falls, or combat-related injuries. • Only assessed blister outcomes • Only assessed concussion/traumatic brain injury outcomes • Assessed only tertiary‡ MSK-I prevention • Cadaveric or in situ model studies • Case reports, editorials, periodicals and letters to the editor • Only involved veterans

MSK = Musculoskeletal; MSK-I = Musculoskeletal Injury; MSK-IMPP = Musculoskeletal Injury Mitigation and Prevention Program

Notes:

* Primary injury prevention was defined as any intervention or measure that was introduced to reduce the risk of sustaining an initial MSK-I.¹⁻³

† Secondary injury prevention was defined as any intervention or measure that was introduced to reduce the risk of sustaining a new or recurrent MSK-I after an initial MSK-I.^{1,2}

‡ Tertiary injury prevention was defined as any intervention or measure that was introduced to reduce or eliminate long-term impairment and disabilities after an initial MSK-I, and to promote adjustment to implications from injury.³

Appendix SA.3. Description of all included studies

First Author	Year	Study Design	Sex	Country	Military Branch	Injury Prevention Program	Barriers to Implementation	Facilitators to Implementation
Aaltonen ⁴	2007	Systematic Review		Finland	Multiple Branches	NA	- Limited Resources	
Alricsson ⁵	2004	Prospective Cohort	Male	Sweden	Air Force	Adding an Exercise Intervention	- Competing Military Priorities	- Involvement/Proximity of Experts - Targeted Design of MSK-IMPP
Amako ⁶	2003	Prospective Cohort	Male	Japan	Army	Adding an Exercise Intervention		- Low Burden on Resources - Strong Stakeholder Engagement
Amoroso ⁷	1998	Prospective Cohort	Male	United States	Army	Equipment	- Equipment-Related Factors	- Involvement/Proximity of Experts
Andersen ⁸	2016	Narrative Review		United States	Multiple Branches	NA		
Äng ⁹	2009	Randomized Controlled Trial	Male	Sweden	Air Force	Adding an Exercise Intervention		- Proximity and Continued Engagement with MSK-IMPP Experts
Aronen ¹⁰	1984	Quasi-Experimental	Male	United States	Navy	Post-Injury Treatment/Rehabilitation		
Arslan ¹¹	2021	Systematic Review		Netherlands	Multiple Branches	NA		
Barnes ¹²	2015	Randomized Controlled Trial	Female	United States	Air Force	Nutrition/Supplementation	-Lack of Stakeholder Engagement	- Low Burden on Resources
Baxter ¹³	2011	Quasi-Experimental	Male	New Zealand	Multiple Branches	Equipment		- Low Burden on Resources

Baxter ¹⁴	2012	Systematic Review			Multiple Branches	NA		
Berg Rice ¹⁵	2002	Mixed Methods	Male	United States	Army	Data-Driven Approach	- Competing Military Priorities - Lack of Stakeholder Engagement - Limited Resources	- Strong Stakeholder Engagement
Berg Rice ¹⁶	2007	Prospective Cohort	Male	United States	Army	Pre-Training MSK-I Symptom Screening and Referral	- Limited Resources	
Bonanno ¹⁷	2018	Randomized Controlled Trial	Male/ Female	Australia	Navy	Equipment		- Low Burden on Resources
Brushoj ¹⁸	2008	Randomized Controlled Trial	Male	Denmark	Army	Adding an Exercise Intervention	- Competing Military Priorities - Lack of Stakeholder Engagement - Limited Resources	- Providing Injury Mitigation Education - Emphasizing End-User Acceptability - Low Burden on Resources - Targeted Design of MSK-IMPP
Bullock ¹⁹	2010	Systematic Review		United States	Multiple Branches	NA	- Equipment-Related Factors - Limited Resources	
Burgess ²⁰	1998	Retrospective Cohort	Male	United Kingdom	Army	Combination: Equipment, Modified Existing Physical Training, Nutrition/Supplements	-Competing military priorities	- Targeted Design of MSK-IMPP -Strong stakeholder engagement
