

# Subject index

- Aborigines**, Trends in road injury hospitalisation rates for Aboriginal and non-Aboriginal people in Western Australia, 1971–97, **211**
- access**, Prevalence of youth access to alcohol or a gun in the home, **227**
- accident and emergency**, Identification and characteristics of victims of violence identified by emergency physicians, triage nurses, and the police, **321**
- accident prevention**, Association between state level drinking and driving countermeasures and self reported alcohol impaired driving, **106**
- accidental falls**, Are we blind to injuries in the visually impaired? A review of the literature, **155**
- accidents, traffic**, Association of seat belt use with death: a comparison of estimates based on data from police and estimates based on data from trained crash investigators, **338**
- accidents**, Banning the word “accident”, **87**  
Mobilizing for pedestrian safety: an experiment in community action, **264**
- administration methods**, Comparison of two methods for assessing injuries among preschool children, **79**
- adolescence**, Rationale for graduated licensing and the risks it should address, **ii9**
- adolescent development**, Developmental sources of crash risk in young drivers, **ii17**
- adolescent**, Adolescent injury morbidity in New Zealand, 1987–96, **32**  
Prevalence of youth access to alcohol or a gun in the home, **227**  
Risk factors associated with non-fatal adolescent firearm injuries, **147**
- Africa**, Citywide trauma experience in Kampala, Uganda: a call for intervention, **133**
- age validation**, How old is that child? Validating the accuracy of age assignments in observational surveys of vehicle restraint use, **248**
- aggression**, Prevention of injury by early socialization of aggressive behavior, **iv17**
- air guns**, Trends in BB/pellet gun injuries in children and teenagers in the United States, 1985–99, **185**
- alcohol drinking**, Association between state level drinking and driving countermeasures and self reported alcohol impaired driving, **106**
- alcohol impaired driving**, Drinking histories of fatally injured drivers, **221**  
Understanding the knowledge and attitudes of commercial drivers in Ghana regarding alcohol impaired driving, **53**
- alcoholism**, Drinking histories of fatally injured drivers, **221**
- alcohol**, Personal and situational influences on drink driving and sober driving among a cohort of young adults, **111**  
Prevalence of youth access to alcohol or a gun in the home, **227**  
Understanding the knowledge and attitudes of commercial drivers in Ghana regarding alcohol impaired driving, **53**
- All Wales Injury Surveillance System**, Development and use of a population based injury surveillance system: the All Wales Injury Surveillance System (AWISS), **83**
- ambulance service**, Patterns of violence in Karachi, Pakistan, **57**
- American Indians**, Injury prevention and indigenous peoples, **175**
- athletics**, Injury prevention in sport: not yet part of the game?, **iv22**
- Australia**, Trends in road injury hospitalisation rates for Aboriginal and non-Aboriginal people in Western Australia, 1971–97, **211**
- Australian football**, Safety attitudes and beliefs of junior Australian football players, **151**
- automobile driving**, Association between state level drinking and driving countermeasures and self reported alcohol impaired driving, **106**  
Characteristics of pregnant women in motor vehicle crashes, **207**
- Barell matrix**, An introduction to the Barell body region by nature of injury diagnosis matrix, **91**  
The Barell matrix, **259**
- BB gun**, Trends in BB/pellet gun injuries in children and teenagers in the United States, 1985–99, **185**
- behaviours**, Are squash players protecting their eyes?, **239**
- bicycle helmets**, New Zealand bicycle helmet law—do the costs outweigh the benefits?, **317**  
State level estimates of the incidence and economic burden of head injuries stemming from non-universal use of bicycle helmets, **47**
- bicycle**, Effects of state helmet laws on bicycle helmet use by children and adolescents, **42**
- bicyclist**, Child bicyclist injuries: are we obtaining enough information in the emergency department chart?, **165**
- blindness**, Are we blind to injuries in the visually impaired? A review of the literature, **155**
- blood alcohol concentration**, The case for a 0.05% criminal law blood alcohol concentration limit for driving, **iii1**
- blood donors**, The New Zealand Blood Donors’ Health Study: baseline findings of a large prospective cohort study of injury, **66**
- booster seat**, Child passenger safety: potential impact of the Washington State booster seat law on childcare centers, **284**
- brain injury recovery**, Strategies for recovery and regeneration after brain and spinal cord injury, **iv33**
- burn**, Residential fire related deaths and injuries among children: fireplay, smoke alarms, and prevention, **128**
- car seats**, Assessing community child passenger safety efforts in three Northwest Tribes, **289**
- cause of death**, Changes in injury mortality by intent and mechanism in Taiwan, 1975–98, **70**
- Census of Fatal Occupational Injury**, Fatal occupational electrocutions in the United States, **306**
- cervical spine**, Effect of helmet wear on the incidence of head/face and cervical spine injuries in young skiers and snowboarders, **324**
- child play**, Study of the effectiveness of the US safety standard for child resistant cigarette lighters, **192**
- child resistant**, Study of the effectiveness of the US safety standard for child resistant cigarette lighters, **192**
- child safety program**, Evaluation of a child safety program based on the WHO Safe Community model, **23**
- childcare center**, Child passenger safety: potential impact of the Washington State booster seat law on childcare centers, **284**
- childhood pedestrian injuries**, Reducing childhood pedestrian injuries, **i1**
- children**, A strategic approach to community safety, **9**
- cigarette lighter**, Study of the effectiveness of the US safety standard for child resistant cigarette lighters, **192**
- classification**, Regulations, legislation, and classification, **89**
- cohort studies**, Association of seat belt use with death: a comparison of estimates based on data from police and estimates based on data from trained crash investigators, **338**  
Comparison of two methods for assessing injuries among preschool children, **79**  
The New Zealand Blood Donors’ Health Study: baseline findings of a large prospective cohort study of injury, **66**
- commercial driver**, Understanding the knowledge and attitudes of commercial drivers in Ghana regarding alcohol impaired driving, **53**
- communication**, In-vehicle communication systems: the safety aspect, **iv26**
- community based intervention**, Evaluation of a child safety program based on the WHO Safe Community model, **23**
- community based**, Controlled evaluation of a community based injury prevention program in Australia, **18**
- community programs**, Evaluation and other issues, **1**
- compliance**, Hip protector compliance among older people living in residential care homes, **202**
- conditional Poisson regression**, Association of seat belt use with death: a comparison of estimates based on data from police and estimates based on data from trained crash investigators, **338**
- conference proceedings**, Reducing childhood pedestrian injuries, **i1**
- contextual variables**, Role of individual and contextual effects in injury mortality: new evidence from small area analysis, **297**
- cost benefit analysis**, New Zealand bicycle helmet law—do the costs outweigh the benefits?, **317**
- cost effectiveness**, New Zealand bicycle helmet law—do the costs outweigh the benefits?, **317**
- crash trends**, Older driver involvements in police reported crashes and fatal crashes: trends and projections, **116**
- criminals**, Do criminals go to the hospital when they are shot?, **236**
- database**, Implementation of a system of surveillance of childhood injuries involved in a Safe Community program: the example of Boulogne-Billancourt (France), **330**
- death certificate**, Underestimates of unintentional firearm fatalities: comparing Supplementary Homicide Report data with the National Vital Statistics System, **252**
- Delphi survey**, Research on injury prevention: topics for systematic review, **161**
- depression**, Association of rates of household handgun ownership, lifetime major depression, and serious suicidal thoughts with rates of suicide across US census regions, **313**
- design issues**, Influence of free trade on the politics of safety, **3**
- developing countries**, Understanding the knowledge and attitudes of commercial drivers in Ghana regarding alcohol impaired driving, **53**

- developing country**, Childhood injury prevention practices by parents in Mexico, **303**  
District hospital based injury data—are they an option in a developing country?, **345**
- diary**, Comparison of two methods for assessing injuries among preschool children, **79**
- direct health costs**, State level estimates of the incidence and economic burden of head injuries stemming from non-universal use of bicycle helmets, **47**
- drink driving**, Personal and situational influences on drink driving and sober driving among a cohort of young adults, **111**
- driver deaths**, Older driver involvements in police reported crashes and fatal crashes: trends and projections, **116**
- driver education**, The safety value of driver education and training, **ii3**
- drivers**, From the editor's desk, **173**
- driving crash risk**, Developmental sources of crash risk in young drivers, **ii17**
- driving risk**, Promoting parental management of teen driving, **ii24**  
Rationale for graduated licensing and the risks it should address, **ii9**  
The safety value of driver education and training, **ii3**
- drowning, external cause of death codes**, Drowning in Finland: "external cause" and "injury" codes, **342**
- early childhood**, Prevention of injury by early socialization of aggressive behavior, **iv17**
- economic evaluation**, New Zealand bicycle helmet law—do the costs outweigh the benefits?, **317**
- education**, A strategic approach to community safety, **9**
- elderly**, Hip protector compliance among older people living in residential care homes, **202**  
Motor vehicle and fall related deaths among older Americans 1990–98: sex, race, and ethnic disparities, **272**
- electrocution**, Fatal occupational electrocutions in the United States, **306**
- elementary education**, Evaluation of the THINK FIRST For KIDS injury prevention curriculum for primary students, **257**
- emergency medicine**, Child bicyclist injuries: are we obtaining enough information in the emergency department chart?, **165**
- environment design**, Mobilizing for pedestrian safety: an experiment in community action, **264**
- environmental countermeasures**, A strategic approach to community safety, **9**
- epidemiologic methods**, Association of seat belt use with death: a comparison of estimates based on data from police and estimates based on data from trained crash investigators, **338**
- epidemiology**, Adolescent injury morbidity in New Zealand, 1987–96, **32**  
District hospital based injury data—are they an option in a developing country?, **345**  
Residential fire related deaths and injuries among children: fireplay, smoke alarms, and prevention, **128**  
The New Zealand Blood Donors' Health Study: baseline findings of a large prospective cohort study of injury, **66**
- ethnicity**, The nature of newspaper coverage of homicide, **121**
- etiologic research**, Prevention of injuries to children and adolescents, **iv5**
- evaluation research**, From the editor's desk, **173**
- evaluation**, Evaluation and other issues, **1**  
Evaluation of a child safety program based on the WHO Safe Community model, **23**  
Evaluation of the THINK FIRST For KIDS injury prevention curriculum for primary students, **257**  
Statistical and design issues in studies of groups, **6**
- exposure**, Exposure to traffic among urban children injured as pedestrians, **231**
- eye injuries**, Are squash players protecting their eyes?, **239**
- fall**, Motor vehicle and fall related deaths among older Americans 1990–98: sex, race, and ethnic disparities, **272**
- falls**, Population based study of hospitalised fall related injuries in older people, **280**  
Socioeconomic differences in injury risks in childhood and adolescence: a nation-wide study of intentional and unintentional injuries in Sweden, **137**  
Visual impairment and risk of falls and fracture, **259**
- fetal injury**, Characteristics of pregnant women in motor vehicle crashes, **207**
- firearm homicide/suicide**, Missing the target: a comparison of buyback and fatality related guns, **143**
- firearm**, Association of rates of household handgun ownership, lifetime major depression, and serious suicidal thoughts with rates of suicide across US census regions, **313**  
Underestimates of unintentional firearm fatalities: comparing Supplementary Homicide Report data with the National Vital Statistics System, **252**
- firearms**, Do criminals go to the hospital when they are shot?, **236**  
Risk factors associated with non-fatal adolescent firearm injuries, **147**  
Trends in BB/pellet gun injuries in children and teenagers in the United States, 1985–99, **185**  
Yes, Americans are often shot—and so are many others, **262**
- fire**, Potential public health importance of the oven ready chip, **328**  
Study of the effectiveness of the US safety standard for child resistant cigarette lighters, **192**
- fireplay**, Residential fire related deaths and injuries among children: fireplay, smoke alarms, and prevention, **128**
- fracture**, Hip protector compliance among older people living in residential care homes, **202**
- fractures**, Visual impairment and risk of falls and fracture, **259**
- gender differences**, Developmental sources of crash risk in young drivers, **ii17**
- gender**, The security of urban women: practice, research, and partnerships, **iv15**
- government leadership**, Regulations, legislation, and classification, **89**
- graduated driving licensing**, Graduated driver licensing: what works?, **ii32**
- graduated licensing**, Rationale for graduated licensing and the risks it should address, **ii9**
- group studies**, Influence of free trade on the politics of safety, **3**
- gun buyback programs**, Missing the target: a comparison of buyback and fatality related guns, **143**
- gunshot**, Do criminals go to the hospital when they are shot?, **236**
- guns**, Guns in the world: old news and new news, **177**  
Prevalence of youth access to alcohol or a gun in the home, **227**  
Studying homicide in the home and how guns are kept, **345**  
Underestimates of unintentional firearm fatalities: comparing Supplementary Homicide Report data with the National Vital Statistics System, **252**
- handgun**, Association of rates of household handgun ownership, lifetime major depression, and serious suicidal thoughts with rates of suicide across US census regions, **313**
- head injury**, Effect of helmet wear on the incidence of head/face and cervical spine injuries in young skiers and snowboarders, **324**  
New Zealand bicycle helmet law—do the costs outweigh the benefits?, **317**  
State level estimates of the incidence and economic burden of head injuries stemming from non-universal use of bicycle helmets, **47**
- head protection**, Effect of helmet wear on the incidence of head/face and cervical spine injuries in young skiers and snowboarders, **324**
- head protective devices**, Effects of state helmet laws on bicycle helmet use by children and adolescents, **42**
- helmet**, Effects of state helmet laws on bicycle helmet use by children and adolescents, **42**
- hip fracture**, Lipid-lowering agents and the risk of hip fracture in a Medicaid population, **276**
- hip protectors**, Hip protector compliance among older people living in residential care homes, **202**
- homicide**, Studying homicide in the home and how guns are kept, **345**  
The nature of newspaper coverage of homicide, **121**  
Underestimates of unintentional firearm fatalities: comparing Supplementary Homicide Report data with the National Vital Statistics System, **252**  
Yes, Americans are often shot—and so are many others, **262**
- hospital discharge data**, Traps for the unwary in estimating person based injury incidence using hospital discharge data, **332**
- hospital discharge**, Pediatric motor vehicle related injuries in the Navajo Nation: the impact of the 1988 child occupant restraint laws, **216**
- hospitalised injuries**, Population based study of hospitalised fall related injuries in older people, **280**
- hospital**, Recording of community violence by medical and police services, **246**
- hospitalization**, Trends in road injury hospitalisation rates for Aboriginal and non-Aboriginal people in Western Australia, 1971–97, **211**
- hot tap water scalds**, Safe hot tap water and the risk of scalds and legionella infection, **170**
- indigenous peoples**, Injury prevention and indigenous peoples, **175**
- infant equipment**, Assessing community child passenger safety efforts in three Northwest Tribes, **289**  
How old is that child? Validating the accuracy of age assignments in observational surveys of vehicle restraint use, **248**
- injury control**, Prevention of injuries to children and adolescents, **iv5**
- injury cost**, Setting priorities in injury prevention: the application of an incidence based cost model, **74**
- injury incidence**, Traps for the unwary in estimating person based injury incidence using hospital discharge data, **332**
- injury mortality**, Role of individual and contextual effects in injury mortality: new evidence from small area analysis, **297**
- injury outcome**, Citywide trauma experience in Kampala, Uganda: a call for intervention, **133**

- injury risk**, Influence of safety gear on parental perceptions of injury risk and tolerance for children's risk taking, **27**
- injury**, Occupational injury prevention research: progress and priorities, **iv9**
- intentional injuries**, What distinguishes unintentional injuries from injuries due to intimate partner violence: a study in Greek ambulatory care settings, **197**
- intentional injury**, From the editor's desk, **173**
- international policy**, Yes, Americans are often shot—and so are many others, **262**
- intervention**, Statistical and design issues in studies of groups, **6**
- intimate partner violence**, What distinguishes unintentional injuries from injuries due to intimate partner violence: a study in Greek ambulatory care settings, **197**
- in-vehicle**, In-vehicle communication systems: the safety aspect, **iv26**
- jail**, Do criminals go to the hospital when they are shot?, **236**
- junior players**, Safety attitudes and beliefs of junior Australian football players, **151**
- Latin America, Mexico**, Childhood injury prevention practices by parents in Mexico, **303**
- law**, Effects of state helmet laws on bicycle helmet use by children and adolescents, **42**
- league table**, UNICEF's child injury league table. An analysis of legislation: more mixed messages, **97**
- legionella**, Safe hot tap water and the risk of scalds and legionella infection, **170**
- legislation**, Association between state level drinking and driving countermeasures and self reported alcohol impaired driving, **106**  
New Zealand bicycle helmet law—do the costs outweigh the benefits?, **317**  
Regulations, legislation, and classification, **89**  
UNICEF's child injury league table. An analysis of legislation: more mixed messages, **97**
- licensing practices**, Graduated driver licensing: what works?, **ii32**
- lighter**, Study of the effectiveness of the US safety standard for child resistant cigarette lighters, **192**
- lipid-lowering agents**, Lipid-lowering agents and the risk of hip fracture in a Medicaid population, **276**
- lobbying**, Mobilizing for pedestrian safety: an experiment in community action, **264**
- mass media**, Mobilizing for pedestrian safety: an experiment in community action, **264**
- maternal education**, Risk factors for burns in children: crowding, poverty, and poor maternal education, **38**
- media**, Media coverage as a risk factor in suicide, **iv30**  
When doing nothing can cause harm, **346**
- medical injuries**, Traps for the unwary in estimating person based injury incidence using hospital discharge data, **332**
- medical record**, Child bicyclist injuries: are we obtaining enough information in the emergency department chart?, **165**
- medical records**, Identification and characteristics of victims of violence identified by emergency physicians, triage nurses, and the police, **321**
- Montreal Declaration**, From the editor's desk, **173**
- morbidity**, Adolescent injury morbidity in New Zealand, 1987–96, **32**
- mortality**, Changes in injury mortality by intent and mechanism in Taiwan, 1975–98, **70**
- motor vehicle crashes**, Characteristics of pregnant women in motor vehicle crashes, **207**  
Older driver involvements in police reported crashes and fatal crashes: trends and projections, **116**
- motor vehicle crash**, Drinking histories of fatally injured drivers, **221**
- motor vehicle injury**, Pediatric motor vehicle related injuries in the Navajo Nation: the impact of the 1988 child occupant restraint laws, **216**
- motor vehicle occupant injury**, Association between the inception of a SAFE KIDS Coalition and changes in pediatric unintentional injury rates, **242**
- motor vehicle**, Motor vehicle and fall related deaths among older Americans 1990–98: sex, race, and ethnic disparities, **272**  
Personal and situational influences on drink driving and sober driving among a cohort of young adults, **111**
- multilevel modelling**, Role of individual and contextual effects in injury mortality: new evidence from small area analysis, **297**
- Native American**, Pediatric motor vehicle related injuries in the Navajo Nation: the impact of the 1988 child occupant restraint laws, **216**
- Navajo Nation**, Pediatric motor vehicle related injuries in the Navajo Nation: the impact of the 1988 child occupant restraint laws, **216**
- New Zealand Blood Donors' Health Study**, The New Zealand Blood Donors' Health Study: baseline findings of a large prospective cohort study of injury, **66**
- News and notes**, **12, 101, 181, 268**
- newspaper coverage**, The nature of newspaper coverage of homicide, **121**
- newspaper reporting**, When doing nothing can cause harm, **346**
- non-powder guns**, Trends in BB/pellet gun injuries in children and teenagers in the United States, 1985–99, **185**
- observational studies**, How old is that child? Validating the accuracy of age assignments in observational surveys of vehicle restraint use, **248**
- occupant protection**, Assessing community child passenger safety efforts in three Northwest Tribes, **289**  
How old is that child? Validating the accuracy of age assignments in observational surveys of vehicle restraint use, **248**
- occupant restraint law**, Pediatric motor vehicle related injuries in the Navajo Nation: the impact of the 1988 child occupant restraint laws, **216**
- occupational injury**, Fatal occupational electrocutions in the United States, **306**
- occupational**, Occupational injury prevention research: progress and priorities, **iv9**
- older adult, motor vehicle, suicide, falls**, Injuries among older adults: the challenge of optimizing safety and minimizing unintended consequences, **iv2**
- older drivers**, Older driver involvements in police reported crashes and fatal crashes: trends and projections, **116**
- older people**, Population based study of hospitalised fall related injuries in older people, **280**
- online publication**, Evaluation and other issues, **1**
- oven ready chip**, Potential public health importance of the oven ready chip, **328**
- Pakistan**, Patterns of violence in Karachi, Pakistan, **57**  
Patterns of violence in Karachi, Pakistan, **345**
- parental management**, Promoting parental management of teen driving, **ii24**
- parental perceptions**, Influence of safety gear on parental perceptions of injury risk and tolerance for children's risk taking, **27**
- parenting**, Promoting parental management of teen driving, **ii24**
- partial sight**, Are we blind to injuries in the visually impaired? A review of the literature, **155**
- partner violence**, What distinguishes unintentional injuries from injuries due to intimate partner violence: a study in Greek ambulatory care settings, **197**
- partnership**, The security of urban women: practice, research, and partnerships, **iv15**
- pattern of injuries**, Citywide trauma experience in Kampala, Uganda: a call for intervention, **133**
- pedestrians**, A strategic approach to community safety, **9**
- pediatric**, Pediatric motor vehicle related injuries in the Navajo Nation: the impact of the 1988 child occupant restraint laws, **216**
- pellet gun**, Trends in BB/pellet gun injuries in children and teenagers in the United States, 1985–99, **185**
- penetrating wounds**, Patterns of violence in Karachi, Pakistan, **57**
- police**, Recording of community violence by medical and police services, **246**
- politics of safety**, Evaluation and other issues, **1**
- population**, Development and use of a population based injury surveillance system: the All Wales Injury Surveillance System (AWISS), **83**
- pregnancy**, Characteristics of pregnant women in motor vehicle crashes, **207**
- priority setting**, Setting priorities in injury prevention: the application of an incidence based cost model, **74**
- problem drinking**, Drinking histories of fatally injured drivers, **221**
- productivity loss**, State level estimates of the incidence and economic burden of head injuries stemming from non-universal use of bicycle helmets, **47**
- program evaluation**, Assessing community child passenger safety efforts in three Northwest Tribes, **289**  
Controlled evaluation of a community based injury prevention program in Australia, **18**
- prospective studies**, Comparison of two methods for assessing injuries among preschool children, **79**
- protective eyewear**, Are squash players protecting their eyes?, **239**
- quasiexperimental studies**, Evaluation of a child safety program based on the WHO Safe Community model, **23**
- race**, Motor vehicle and fall related deaths among older Americans 1990–98: sex, race, and ethnic disparities, **272**
- readmissions**, Traps for the unwary in estimating person based injury incidence using hospital discharge data, **332**
- recording**, Recording of community violence by medical and police services, **246**
- recreational injury**, Recreational injury and its relation to socioeconomic status among school aged children in the US, **60**
- regeneration**, Strategies for recovery and regeneration after brain and spinal cord injury, **iv33**
- regulations**, Regulations, legislation, and classification, **89**
- research**, Research on injury prevention: topics for systematic review, **161**

- residential fire**, Residential fire related deaths and injuries among children: fireplay, smoke alarms, and prevention, **128**
- reviewers**, A trip on the world wide web, **261**
- rich nations**, UNICEF's child injury league table. An analysis of legislation: more mixed messages, **97**
- risk factor**, Rationale for graduated licensing and the risks it should address, **ii9**
- Risk factors associated with non-fatal adolescent firearm injuries, **147**
- The New Zealand Blood Donors' Health Study: baseline findings of a large prospective cohort study of injury, **66**
- What distinguishes unintentional injuries from injuries due to intimate partner violence: a study in Greek ambulatory care settings, **197**
- risk taking**, Influence of safety gear on parental perceptions of injury risk and tolerance for children's risk taking, **27**
- road safety**, New Zealand bicycle helmet law—do the costs outweigh the benefits?, **317**
- Understanding the knowledge and attitudes of commercial drivers in Ghana regarding alcohol impaired driving, **53**
- Safe Community**, Evaluation of a child safety program based on the WHO Safe Community model, **23**
- Implementation of a system of surveillance of childhood injuries involved in a Safe Community program: the example of Boulogne-Billancourt (France), **330**
- SAFE KIDS Campaign**, Association between the inception of a SAFE KIDS Coalition and changes in pediatric unintentional injury rates, **242**
- safety attitudes and beliefs**, Safety attitudes and beliefs of junior Australian football players, **151**
- safety gear**, Influence of safety gear on parental perceptions of injury risk and tolerance for children's risk taking, **27**
- safety**, Childhood injury prevention practices by parents in Mexico, **303**
- sample size**, Evaluation and other issues, **1**
- scalding burns**, Risk factors for burns in children: crowding, poverty, and poor maternal education, **38**
- school aged children**, Recreational injury and its relation to socioeconomic status among school aged children in the US, **60**
- seat belt effectiveness**, Bias in estimates of seat belt effectiveness, **263**
- seat belt use**, Effectiveness of Ford's belt reminder system in increasing seat belt use, **293**
- seat belts**, Association of seat belt use with death: a comparison of estimates based on data from police and estimates based on data from trained crash investigators, **338**
- Sixth World Conference on Injury Prevention**, Introduction, **iv1**
- skiing**, Effect of helmet wear on the incidence of head/face and cervical spine injuries in young skiers and snowboarders, **324**
- small area analysis**, Role of individual and contextual effects in injury mortality: new evidence from small area analysis, **297**
- small arms**, Guns in the world: old news and new news, **177**
- smoke alarm/detector**, Residential fire related deaths and injuries among children: fireplay, smoke alarms, and prevention, **128**
- snowboarding**, Effect of helmet wear on the incidence of head/face and cervical spine injuries in young skiers and snowboarders, **324**
- social inequalities**, Socioeconomic differences in injury risks in childhood and adolescence: a nation-wide study of intentional and unintentional injuries in Sweden, **137**
- socialization**, Prevention of injury by early socialization of aggressive behavior, **iv17**
- sociodemographic pattern** What distinguishes unintentional injuries from injuries due to intimate partner violence: a study in Greek ambulatory care settings, **197**
- socioeconomic factors**, Risk factors for burns in children: crowding, poverty, and poor maternal education, **38**
- socioeconomic position**, Role of individual and contextual effects in injury mortality: new evidence from small area analysis, **297**
- socioeconomic status**, Recreational injury and its relation to socioeconomic status among school aged children in the US, **60**
- spinal cord injury recovery**, Strategies for recovery and regeneration after brain and spinal cord injury, **iv33**
- Splinters & Fragments**, **88, 172, 260, 348**
- sports injury**, Safety attitudes and beliefs of junior Australian football players, **151**
- sports**, Injury prevention in sport: not yet part of the game?, **iv22**
- squash**, Are squash players protecting their eyes?, **239**
- state of the art presentations**, Introduction, **iv1**
- suicide**, Association of rates of household handgun ownership, lifetime major depression, and serious suicidal thoughts with rates of suicide across US census regions, **313**
- Media coverage as a risk factor in suicide, **iv30**
- Socioeconomic differences in injury risks in childhood and adolescence: a nation-wide study of intentional and unintentional injuries in Sweden, **137**
- Yes, Americans are often shot—and so are many others, **262**
- surveillance data**, Setting priorities in injury prevention: the application of an incidence based cost model, **74**
- surveillance system**, Implementation of a system of surveillance of childhood injuries involved in a Safe Community program: the example of Boulogne-Billancourt (France), **330**
- surveillance**, Child bicyclist injuries: are we obtaining enough information in the emergency department chart?, **165**
- Development and use of a population based injury surveillance system: the All Wales Injury Surveillance System (AWISS), **83**
- Do criminals go to the hospital when they are shot?, **236**
- Population based study of hospitalised fall related injuries in older people, **280**
- Trends in BB/pellet gun injuries in children and teenagers in the United States, 1985–99, **185**
- survivors/psychology**, Mobilizing for pedestrian safety: an experiment in community action, **264**
- systematic review**, Research on injury prevention: topics for systematic review, **161**
- Taiwan**, Changes in injury mortality by intent and mechanism in Taiwan, 1975–98, **70**
- technology**, In-vehicle communication systems: the safety aspect, **iv26**
- teenager**, The safety value of driver education and training, **ii3**
- THINK FIRST**, Evaluation of the THINK FIRST For KIDS injury prevention curriculum for primary students, **257**
- traffic accidents**, Understanding the knowledge and attitudes of commercial drivers in Ghana regarding alcohol impaired driving, **53**
- traffic death**, Drinking histories of fatally injured drivers, **221**
- traffic engineering**, A strategic approach to community safety, **9**
- traffic injury**, The New Zealand Blood Donors' Health Study: baseline findings of a large prospective cohort study of injury, **66**
- traffic**, Exposure to traffic among urban children injured as pedestrians, **231**
- Socioeconomic differences in injury risks in childhood and adolescence: a nation-wide study of intentional and unintentional injuries in Sweden, **137**
- Trends in road injury hospitalisation rates for Aboriginal and non-Aboriginal people in Western Australia, 1971–97, **211**
- traffic/prevention and control**, Mobilizing for pedestrian safety: an experiment in community action, **264**
- transportation law**, Child passenger safety: potential impact of the Washington State booster seat law on childcare centers, **284**
- transportation**, Effects of state helmet laws on bicycle helmet use by children and adolescents, **42**
