Seattle, WA 98104

Dear Dr. Johnston:

Attached please find the electronic file of our further revised paper, “Unintentional Alcohol and Drug Poisoning in Association with Substance Use Disorders and Mood and Anxiety Disorders: Results from the 2010 Nationwide Inpatient Sample” (Ref.: Ms. No. injuryprev-2012-040732.R1).

At the advice of the handling editor, we have inserted changes to the Abstract (in the Conclusion section) and to the Discussion section of the paper (on Page 14). These changes acknowledge the potential bias in the data that may have resulted in differential patient mental condition screening practices. To keep the abstract and the text within the journal’s word count limits, we also made a few minor edits throughout the paper. We have attached a second electronic file with all changes marked.

We want to thank the reviewers for their re-review of our manuscript, and the handling editor for his/her advice on the confounding issue, which helped us to further improve the presentation of the study.

Sincerely,

Young-Hee Yoon (Corresponding author)
