

Table 5: Correlation Between the Direct Estimates and SAE Predictions of the Proportion of Population with Reported Adverse Childhood Experiences in the United States, 2019-2020.

Geographic Unit	Pearson Correlation Coefficient			
	0 ACEs	1 ACE	2-3 ACEs	4+ ACEs
State level	0.87	0.76	0.87	0.95
Census division level	0.97	0.85	0.96	0.98

Abbreviations: SAE = Small Area Estimate.

All estimates in this tables are obtained from 37 states that included ACEs questions in their BRFSS surveys in 2019-2020. Pearson correlation coefficient between the direct estimates from BRFSS and SAE predictions are reported only for those respondents who decided to answer a certain ACEs question.
